SOFTWARE ENGINEERING & IT SUPPORT CO-OP STUDENT

TECHNICAL SUPPORT | C# | SQL | WINDOWS/LINUX | WEB DEVELOPMENT

SUMMARY

- Software Engineering Technology - Artificial Intelligence student with hands-on experience using Windows-based development tools, programming environments, databases, and web technologies through coursework and academic projects.
- Experience troubleshooting software setup and configuration issues, debugging and testing applications, with academic exposure to Unix/Linux concepts, software requirements analysis, and the software development life cycle.
- Programming foundation in C#, Java, Python, JavaScript, and SQL, with experience in object-oriented programming, relational databases, and responsive web development.
- Strong customer service, communication, teamwork, organization, attention to detail, and problem-solving skills developed through technical projects and fast-paced work experience.

TECHNICAL SKILLS

Technical Support / Systems: Experience diagnosing common software setup and configuration issues in Windows-based coursework environments, including IDEs, JDK/.NET SDK, Node.js, and database tools. Academic exposure to Unix/Linux operating system concepts.

Programming / OOP: Experience with C#, Java, Python, and JavaScript. Familiar with classes, objects, constructors, inheritance, encapsulation, polymorphism, and methods; develops C# applications using the .NET SDK and Visual Studio.

SQL / Databases: Uses SQL to query, filter, join, aggregate, and manage relational data. Experience with Oracle Database XE and SQL Developer, joins, subqueries, normalization, ER diagrams, and relational database design.

Web Development: Uses HTML, CSS, and JavaScript to build responsive web pages and interactive features. Learning React and Express, including communication with back-end services and APIs.

Testing / Requirements / SDLC: Familiar with debugging, application testing, requirements gathering and analysis, and software development life cycle concepts including design, implementation, testing, and maintenance.

Microsoft & Development Tools: Uses Microsoft Word, Excel, PowerPoint, Visual Studio, Visual Studio Code, Eclipse, Jupyter Notebook, Git, and GitHub for documentation, coursework, version control, and technical projects.

EDUCATION

Software Engineering Technology - Artificial Intelligence Advanced Diploma Sept. 2025 - Present

Centennial College, Scarborough, ON

Key Courses: Unix/Linux OS | C# Programming | Software Requirements Engineering | Advanced Database Concepts (SQL) | Web Application Development | Client-Side Web Development | Java Programming | Python Programming

Academic Projects

Web Development - HTML, CSS, JavaScript

- Designed and developed a responsive website for a local barbecue restaurant using HTML, CSS, and JavaScript with a focus on usability and clear navigation
- Implemented interactive front-end features, tested page behavior, and troubleshot JavaScript and layout issues during development
- Used browser developer tools and iterative testing to identify and correct front-end issues

Book Publisher Database System - SQL

- Collaborated with a team to gather requirements and develop a relational database system for managing book publishing company data
- Designed a normalized database structure, created an ER diagram, and implemented and tested the database using Oracle SQL Developer

AI Chatbot - Python | Codecademy Capstone (In Progress)

- Currently developing a Python-based chatbot that processes user questions and provides relevant responses from a predefined set of topics and information
- Testing different user inputs and refining response logic while applying introductory natural language processing techniques

Professional Development

Business Intelligence Data Analyst Career Path | Codecademy (Online) — In Progress
Machine Learning: Logistic Regression | Codecademy (Online) — March 2026
Design Databases With PostgreSQL Skill Path | Codecademy (Online) — Feb. 2026
Learn Data Analysis with Pandas | Codecademy (Online) — Feb. 2026
Analyze Data with SQL Skill Path | Codecademy (Online) — Jan. 2026

Work Experience

Crew Member | McDonald's, Richmond Hill — June 2026 - Present

- Provide courteous customer service, answer questions, process orders, and respond to customer needs in a fast-paced environment
- Work collaboratively with team members, communicate clearly, and adapt to changing priorities while completing assigned tasks
- Follow established procedures accurately, maintain organized work areas, and complete tasks efficiently with attention to detail
